### EVOLUTION

Explain the five principles of natural selection

#### **EVOLUTION**

Describe the five agents of evolutionary change acting on a population

### **EVOLUTION**

Explain how reproductive (sympatric) isolation leads to speciation

# **EVOLUTION**

List & describe pre-reproductive barriers that lead to speciation

### **EVOLUTION**

Explain how natural selection accounts for the range of species of Galapagos finches

#### **EVOLUTION**

Explain how geographic (allopatric) isolation leads to speciation

## **EVOLUTION**

List & describe post-reproductive barriers that lead to speciation

# **EVOLUTION**

Explain the difference between Darwinian & LaMarckian evolution

EVOLUTION	EVOLUTION
Explain how	
evolution accounts	Explain genetic
for both the	drift & give
diversity & the unity	two examples
of life on Earth	
EVOLUTION	EVOLUTION
Explain bottleneck	Explain founders
effect & give	effect & give
an example	an example
EVOLUTION	EVOLUTION
Explain sexual	Explain
Explain sexual selection & give	Explain co-evolution
Explain sexual	Explain
Explain sexual selection & give an example	Explain co-evolution & give an example
Explain sexual selection & give	Explain co-evolution
Explain sexual selection & give an example	Explain co-evolution & give an example EVOLUTION
Explain sexual selection & give an example EVOLUTION Explain directional	Explain co-evolution & give an example EVOLUTION Explain stabilizing
Explain sexual selection & give an example	Explain co-evolution & give an example EVOLUTION

EVOLUTION	EVOLUTION
Explain disruptive selection. Give an example	Explain how the fossil record supports evolution. Give an example.
EVOLUTION	EVOLUTION
Explain how the anatomical record supports evolution. Give an example.	Explain how the molecular record supports evolution. Give an example.
EVOLUTION	EVOLUTION
Explain how the artificial selection supports evolution. Give an example.	Describe homologous structures, explain their evolutionary significance & give an example
artificial selection supports evolution.	structures, explain their evolutionary significance & give an

EVOLUTION	EVOLUTION
Describe vestigial organs, explain their evolutionary significance & give an example	Explain how pesticide resistance can occur in insects
EVOLUTION	EVOLUTION
Explain how antibiotic resistance can occur in bacteria	In a cat population the black allele is dominant to white. There are 16% white cats. How many black homozygotes & heterozygotes. Assume H-W equilibrium.
EVOLUTION	EVOLUTION
Explain heterozygote advantage. Give an example.	Explain the Ernst Mayr biological species concept
EVOLUTION	EVOLUTION
Explain the difference between gradualism & punctuated equilibrium
